

a pair of pads including a left pad and a right pad, the two pads being positioned to support the respective pelvic ilia of a seated person, the pads including seat platforms at bottom sides, and including only two ~~such~~ seat platforms, one with each of the left and right pads,

a lower platform in spaced relationship below the seat platforms, and

B
JK resilient means connected to and positioned below each ^{to the} seat platform and secured to the lower platform for allowing movement of the pelvis and lower back of the seated person via resilient ^{absorbing} springing action ~~such as to allow~~ ^{such as to allow} the hip and pelvis motion of walking, and allowing for movement in pitch, roll and yaw as well as forward and rearward glide of the ilia and sacral bones relative to one another.

9. A chair seat apparatus for helping relieve and diminish lower back pain and stiffness while seated on the apparatus, comprising:

DP a pair of pads including a left pad and a right pad, the two pads being positioned to support the respective pelvic ilia of a seated person, the pads including seat platforms at bottom sides, and including only two ~~such~~ seat platforms, one with each of the left and right pads,

a lower platform below the seat platforms, and

whereby
resilient support means for supporting the two pads ^{such as} such as
to supporting the two pelvic ilia of the seated person and for
allowing the ilia to move reciprocally relatively to one another
in pitch, roll and yaw motion as well as forward and rearward
glide and lateral glide of the ilia and sacral bones relative to
one another.

B2
10. The apparatus of claim 9, wherein the resilient means
include four resilient units below each ^{of the} seat platform, arranged
in spaced apart relationship, so as to allow said reciprocal
movement in pitch, roll and yaw as well as forward and rearward
glide and lateral glide of the ilia and sacral bones relative to
one another.

B3
11. The apparatus of claim 5, wherein the resilient means
include four resilient units below each ^{of the} seat platform, arranged
in spaced apart relationship, so as to allow said movement in
pitch, roll and yaw as well as forward and rearward glide of the
ilia and sacral bones relative to one another.

MARKED COPIES OF AMENDED CLAIMS 5 AND 9:

5. (Amended) A chair seat and standing apparatus for helping relieve and diminish lower back pain and stiffness while seated in a chair or standing on the apparatus, comprising:

a pair of pads including a left pad and a right pad, the two pads being positioned to support the respective pelvic ilia of a seated person, the pads including seat platforms at bottom sides, and including only two such seat platforms, one with each of the left and right pads, [and]

a lower platform in spaced relationship below the seat platforms, and

resilient means connected to and positioned below [the pad] each seat platform and secured to the lower platform for allowing movement of the pelvis and lower back of the seated person via resilient [balls, springs or magnets,] springing action such as to allow[ing] the hip and pelvis motion of walking, and allowing for movement in pitch, roll and yaw as well as forward and rearward glide of the ilia and sacral bones relative to one another.

9. (Amended) A chair seat apparatus for helping relieve and diminish lower back pain and stiffness while seated on the apparatus, comprising:

a pair of pads including a left pad and a right pad, the two pads being positioned to support the respective pelvic ilia of a seated person, the pads including seat platforms at bottom sides, and including only two such seat platforms, one with each of the left and right pads, [and]

a lower platform below the seat platforms, and

resilient support means for supporting the two pads such as to support the two pelvic ilia of the seated person and for allowing the ilia to move reciprocally relatively to one another in pitch, roll and yaw motion as well as forward and rearward glide and lateral glide of the ilia and sacral bones relative to one another.
